

Rotary drives ERMO, electric

FESTO

Festo core product range
Covers 80% of your automation tasks

Worldwide:

Always in stock

Superb:

Festo quality at an attractive price

Easy:

Simplified procurement and warehousing

★ Generally ready for dispatch from the factory within 24 hours

In stock at 13 Service Centres worldwide

More than 2200 products

★ Generally ready for dispatch from the factory within 5 days

Assembled for you at 4 Service Centres worldwide

Up to 6×10^{12} variants per product family

Just look
for the
star!

Key features

At a glance

General

- Electric rotary drive with stepper motor and integrated gear unit
- ServoLite – regulated operation with encoder
- Sturdy bearing for high forces and torques
- Backlash-free pre-stressed rotating plate with very good axial eccentricity and concentricity

Application areas

- Optional holding brake
- Optionally with pneumatic or electric energy through-feed
- Simple and precise mounting
- Rotating and positioning of parts
- Simple rotary indexing table applications
- As a rotary axis in multi-axis applications

The technology in detail

- [1] Encoder connection
- [2] Motor connection
- [3] Proximity sensor for homing or position sensing
- [4] Thread/centring elements for mounting
- [5] Thread for mounting
- [6] Thread/centring elements for attachments
- [7] Rotating plate

- The energy through-feed can be used to transfer electrical signals or compressed air through the hollow shaft. This enables fast and easy supply to the parts mounted on the rotating plate, even for infinitely rotating applications.
- Also suitable for IO-Link signal data transfer.
- The energy through-feed cannot be used in combination with the stop kit EADP-ES-R3.

Key features

Possible combinations within the Optimised Motion Series (OMS)

Rotary drive ERMO on mini slide DGSL

When combining ERMO-12 with DGSL-12, the proximity sensor SIEN cannot be used as a reference sensor for the ERMO.

In this combination, the stroke is reduced by the head height of the screws for DGSL. This shortened stroke must be compensated by the external cushioning.

Size		Accessories

Certification		RCM compliance mark			

1) Corrosion resistance class CRC 1 to Festo standard FN 940070

Low corrosion stress. Dry indoor application or transport and storage protection. Also applies to parts behind coverings, in the non-visible interior area, and parts which are covered in the application (e.g. drive trunnions).

2) For information about the area of use, see the EC declaration of conformity: www.festo.com/sp → Certificates.

If the devices are subject to usage restrictions in residential, commercial or light-industrial environments, further measures for the reduction of the emitted interference may be necessary.

Data sheet

Energy through-feed

ERMO-...-P2

ERMO-...-E8

The energy through-feed cannot be used in combination with the stop kit EADP-ES-R3.

Function

The energy through-feed can be used to transfer electrical signals or compressed air through the hollow shaft.

Advantages

- Fast and easy supply of the parts mounted on the rotating plate
- Tubing and electrical cables are not damaged by the rotation
- Two variants available:
 - Pneumatic
 - Electric

Variants

Pneumatic: ERMO-...-P2

Electric: ERMO-...-E8
